large and constantly increasing major ity of the American people are catarrh suf-ferers. This is not entirely the result of our changeable climate, but because modern investigation has clearly proven that many diseases known by other names are really catarrh. Formerly the name of catarrh was applied almost exclusively to the common nasal catarrh, but the throat, stomach, liver, bladder, kidneys and intestines are ubject to catarrhal di nasal passages. In fact, wherever there is mucous mem

brane there is a feeding ground for catarrh.

The usual remedies, inhalers, sprays, douches or powders, have been practically failures, as far as anything more than temporary relief was concerned, because they simply dried up the mucous secretions, without having the remetest effect upon the blood and liver, which are the real sources

It has been known for some years that the radical cure of catarrh could never come from local applications, but from an inter-nal remedy, acting on the blood and expelling the catarrhal poison from the sys-
